Summary

Software Developer with a strong foundation in Data Structures and Algorithms and Object-Oriented Programming, with 270+ problems solved on LeetCode and hands-on experience building scalable full-stack systems. Skilled in Java and JavaScript, with experience developing production-ready applications using the MERN stack, MySQL, and RESTful APIs, along with AI and Generative AI integrations, including LLM-based applications and RAG pipelines. Currently learning ServiceNow and exploring enterprise application development and workflow automation, with a strong builder's mindset for solving complex technical challenges at scale.

Technical Skills

Languages: Python, JavaScript, Java, SQL

Web & Backend: React.js, Tailwind CSS, Node.js, Express.js, Flask, FastAPI, RESTful APIs, Microservices, Spring Framework, Spring Boot, Docker, Redis

AI & Machine Learning: Machine Learning, Deep Learning, LLMs, Generative AI, RAG, LangChain, Scikit-learn, NumPy

Tools: Git, GitHub, Postman, ServiceNow, Workflow Automation, Firebase, Clerk

Education

Institute of Engineering & Management, Salt Lake

2023 – 2027

B.Tech in Electronics & Communication Engineering

CGPA: 9.33

Auxilium Convent School

2023

ISC (Class XII)

92.75%

Experience

Software Developer Intern, IEM Research Foundation (IEMCS)

May 2025 – Aug 2025

Engineered a scalable full-stack application using React.js, Node.js, Tailwind CSS, and MySQL following modular MVC architecture. Designed RESTful APIs with role-based access control (RBAC), automated scoring, and streamlined multi-module document validation workflows. Optimized database queries, integrated APIs using Axios, and tested endpoints with Postman to ensure reliable system performance.

Digital Content Design Intern, Tata Structura (TATA Group)

May 2024 – Jul 2024

Designed digital content and layouts using Figma and AI-powered design tools, creating visually engaging assets while improving content creation workflows and supporting efficient campaign delivery.

Projects

KisaanSevak

Built a scalable MERN-based agricultural platform with layered architecture, Firebase authentication, JWT-based admin access, and role-based workflows. Integrated Groq LLMs, Whisper, and ElevenLabs to develop a multilingual voice-enabled AI chatbot and plant disease diagnosis system, along with data-driven features for loan eligibility assessment and real-time mandi price tracking using scoring algorithms and API integrations.

Synthia

Developed an AI-powered academic research platform for multi-paper analysis, context-aware research sessions, comparative insights, and AI-driven literature synthesis. Built a secure Node.js/Express backend with JWT authentication, rate limiting, API integrations, and MongoDB, while implementing citation generation, plagiarism detection, academic writing assistance, methodology extraction, and personalized paper recommendations.

CareerGo (Ongoing)

Built an AI-powered career platform using React.js, Vite, and Tailwind CSS for job discovery, resume management, and career insights. Developed a Resume Studio for job-description-based resume tailoring and AI-assisted bullet regeneration, and implemented a RAG pipeline using document chunking, embeddings, vector database storage, and hybrid search for improved semantic context retrieval.

Achievements & Certifications

- Published a research paper titled "Comparative ML-Based Classification of CO and CO2 Using Multi-Algorithm Analysis of Gas Sensor Data" in IEMTech 2026.
- Solved 270+ LeetCode problems and earned 4 achievement badges, demonstrating strong algorithmic thinking and problem-solving skills.
- Secured 2nd Runner-Up position at HackNITR, a hackathon organized by NIT Rourkela.
- Secured 15th departmental rank based on academic engineering CGPA (9.2).
- Earned the ServiceNow Certified System Administrator (CSA) certification along with 2 Micro-Certifications.
- Completed the Deepskilling Assessment under the Cognizant Digital Nurture Program with 5+ industry certifications.
